

Index, Volume 88

A

Abnormally cold tropopause temperatures in the equatorial Pacific. (4 figs.) C. L. Jordan. 151-154.

Absorption:

An extension of a table of absorption for Elsasser bands. D. Q. Wark and M. Wolk. 249-250.

Air pollution:

Forecasting air pollution potential. (18 figs.) Lawrence E. Niemeyer. 88-96.

An analysis of barotropic forecast errors in cases of rapid sea level cyclogenesis. (6 figs.) David B. Spiegler. 263-268.

Analysis of some preliminary low-level constant level balloon (tetroon) flights. (13 figs.) J. K. Angell and D. H. Pack. 235-248.

ANDREWS, JAMES F.:

The weather and circulation of May 1960—Including a discussion of the unusual retrogression of 5-day mean polar vortices. (13 figs.) 193-202.

ANGELL, J. K.:

Use of tetroons for mesometeorological investigations. [Correspondence] 277. (Reply by D. C. House. 277.)

and D. H. Pack. Analysis of some preliminary low-level constant level balloon (tetroon) flights. (13 figs.) 235-248.

Antarctica:

Extrapolation of the 50-mb. level from 100-mb. data in Antarctica. (1 fig.) William S. Weyant. 251-255.

A preliminary report on ozone observations at Little America, Antarctica. (14 figs.) H. Wexler, W. B. Moreland, and W. S. Weyant. 43-54.

The seasonal variation of the strength of the southern circumpolar vortex. (4 figs.) W. Schwerdtfeger. 203-208.

Soil temperatures at Cape Hallett, Antarctica, 1958. (5 figs.) Norman S. Benes. 223-227.

An apparent observation of ice crystal haze by radar. (8 figs.) [Weather Note] Patrick E. Hughes. 349-352.

ARCAS temperature data in the mesosphere. (2 figs.) D. E. Ogden and D. B. Swinton. 191-192.

ARMSTRONG, C. L.:

and R. D. Garrett. High altitude wind data from meteorological rockets. (3 figs.) 187-190.

Atmosphere. Convection:

On the theory of disturbances in a conditionally unstable atmosphere. (11 figs.) Douglas K. Lilly. 1-17.

AYER, HAROLD S.:

The wind profile at the crest of a large ridge. (8 figs.) 19-23.

B

BEERS, FRANCIS D.:

and DeVer Colson. Use of extended-range prognosis for fire-weather forecasting. (7 figs.) 131-136.

BENES, NORMAN S.:

Soil temperatures at Cape Hallett, Antarctica, 1958. (5 figs.) 223-227.

BOSEN, JULIUS F.:

A formula for approximation of the saturation vapor pressure over water. (1 fig.) 275-276.

BRISTOR, CHARLES L.:

and Mary Ann Ruzecki. TIROS I photographs of the Midwest storm of April 1, 1960. (11 figs.) 315-326.

C

The circulation at the 10-millibar constant pressure surface over North America and adjacent ocean areas, July 1957 through June 1958. (12 figs.) S. Teweles, L. Rothenberg, and F. G. Finger. 137-150.

Circulation. General:

The seasonal variations of the strength of the southern circumpolar vortex. (4 figs.) W. Schwerdtfeger. 203-208.

Circulation. Low-level:

Analysis of some preliminary low-level constant level balloon (tetroon) flights. (13 figs.) J. K. Angell and D. H. Pack. 235-248.

Climatology:

Mean monthly values of precipitable water over the United States, 1946-56. (1 fig.) Clayton H. Reitan. 25-35.

On a special distribution of maximum values. (2 figs.) Raymond Sneyers. 66-69.

A statistical method for estimating the mean relative humidity from the mean air temperature. (2 figs.) William D. Sellers. 155-157.

Cloud pictures from satellite TIROS I. (10 figs.) S. Fritz and H. Wexler. 79-87.

Clouds:

Jet condensation trail shadows. (2 figs.) [Weather Note] Donald H. Lokke. 181.

COLSON, DEVER:

High level thunderstorms of July 31-August 1, 1959. (10 figs.) 279-285.

and Francis D. Beers. Use of extended-range prognoses for fire-weather forecasting. (7 figs.) 131-136.

Comparison of evaporation from Weather Bureau class A and Bureau of Plant Industry (BPI) sunken pans, Fort Assinniboine, Montana. (1 fig.) R. A. Dightman. 101-106.

COUNTRYMAN, CLIVE M.:

and Mark J. Schroeder. Exploratory fireclimate surveys on prescribed burns. (8 figs.) 123-129.

CRESSMAN, GEORGE P.:

Improved terrain effects in barotropic forecasts.
(14 figs.) 327-342.

D

DIGHTMAN, R. A.:

Comparison of evaporation from Weather Bureau class A and Bureau of Plant Industry (BPI) sunken pans, Fort Assinniboine, Montana. (1 fig.) 101-106.

DUNN, CARLOS R.:

The weather and circulation of March 1960—A cold snowy month. (12 figs.) 112-120.

E

EMERSON, MAC A.:

Pressure rise at Yakutat, December 18, 1959. (1 fig.) [Weather Note] 18.

Evaporation:

Comparison of evaporation from Weather Bureau class A and Bureau of Plant Industry (BPI) sunken pans, Fort Assinniboine, Montana. (1 fig.) R. A. Dightman. 101-106.

An experiment in the use of "perfect" prognostic charts.
Philip Williams, Jr. 219-222.

Exploratory fireclimate surveys on prescribed burns.
(8 figs.) Mark J. Schroeder and Clive M. Countryman. 123-129.

An extension of a table of absorption for Elsasser bands.
D. Q. Wark and M. Wolk. 249-250.

Extrapolation to the 50-mb. level from 100-mb. data in Antarctica. (1 fig.) William S. Weyant. 251-255.

F

FINGER, F. G.:

and S. Teweles and L. Rothenberg. The circulation at the 10-millibar constant pressure surface over North America and adjacent ocean areas, July 1957 through June 1958. (12 figs.) 137-150.

Fire weather:

Exploratory fireclimate surveys on prescribed burns.
(8 figs.) Mark J. Schroeder and Clive M. Countryman. 123-129.

High level thunderstorms of July 31-August 1, 1959.
(10 figs.) DeVer Colson. 279-285.

Use of extended-range prognoses for fire-weather forecasting. (7 figs.) Francis D. Beers and DeVer Colson. 131-136.

Forecasting air pollution potential. (18 figs.) Lawrence E. Niemeyer. 88-96.

Forecasting:

An experiment in the use of "perfect" prognostic charts. Philip Williams, Jr. 219-222.

Forecasting air pollution potential. (18 figs.) Lawrence E. Niemeyer. 88-96.

On the practical use of graphical prediction methods.
(1 fig.) Richard J. Reed. 209-218.

Forecasting. Fire-weather:

Use of extended-range prognoses for fire-weather forecasting. (7 figs.) Francis D. Beers and DeVer Colson. 131-136.

Forecasting. Numerical:

An analysis of barotropic forecast errors in cases of rapid sea level cyclogenesis. (6 figs.) David B. Spiegler. 263-268.

Improved terrain effects in barotropic forecasts.
(14 figs.) George P. Cressman. 327-342.

On changes in zonal momentum in short-range numerical prediction. (6 figs.) A. Wiin-Nielsen. 55-65.

Forest fires:

High level thunderstorms of July 31-August 1, 1959.
(10 figs.) DeVer Colson. 279-285.

A formula for approximation of the saturation vapor pressure over water. (1 fig.) Julius F. Bosen. 275-276.

FORTNER, LIMON E.:

and C. L. Jordan. A non-tornadic spiral-shaped radar echo. (4 figs.) 343-348.

FRITZ, S.:

and H. Wexler. Cloud pictures from satellite TIROS I. (10 figs.) 79-87.

G

GARRETT, R. D.:

and C. L. Armstrong. High altitude wind data from meteorological rockets. (3 figs.) 187-190.

GREEN, RAYMOND A.:

The weather and circulation of January 1960—Another January with Atlantic blocking. (10 figs.) 36-42.

The weather and circulation of July 1960—Persistent heat in the Pacific Northwest. (8 figs.) 257-262.

H

HARRELL, WAYNE:

and E. Arlo Richardson. Measurement of sensible air-ground interface temperatures. (3 figs.) 269-273.

High altitude wind data from meteorological rockets.
(3 figs.) C. L. Armstrong and R. D. Garrett. 187-190.

High level thunderstorms of July 31-August 1, 1959.
(10 figs.) DeVer Colson. 279-285.

HOECKER, WALTER H., JR.:

Wind speed and air flow patterns in the Dallas tornado of April 2, 1957. (12 figs.) 167-180.

HOUSE, D. C.:

Remarks on the optimum spacing of upper-air observations. (2 figs.) 97-100.

Reply (to correspondence, Use of tetroons for mesometeorological investigations, J. K. Angell. 277).
277.

HUGHES, PATRICK E.:

An apparent observation of ice crystal haze by radar.
(8 figs.) [Weather Note]. 349-352.

Hurricanes:

Two unique eastern Pacific hurricanes of 1957. (13 figs.). [Weather Note] Rue E. Rush. 107-111.

I**Improved terrain effects in barotropic forecasts.** (14 figs.)

George P. Cressman. 327-342.

Instruments:

Analysis of some preliminary low-level constant level balloon (tetroon) flights. (13 figs.) J. K. Angell and D. H. Pack. 235-248.

Comparison of evaporation from Weather Bureau class A and Bureau of Plant Industry (BPI) sunken pans, Fort Assinniboine, Montana. (1 fig.) R. A. Dightman. 101-106.

Measurement of sensible air-ground interface temperatures. (3 figs.) Wayne Harrell and E. Arlo Richardson. 269-273.

Use of tetroons for mesometeorological investigations. [Correspondence]. J. K. Angell. 277. (Reply by D. C. House. 277).

J**Jet condensation trail shadows.** (2 figs.) [Weather Note]. Donald H. Lokke. 181.**JORDAN, C. L.:**

Abnormally cold tropopause temperatures in the equatorial Pacific. (4 figs.) 151-154.

and Limon E. Fortner. A non-tornadic spiral-shaped radar echo. (4 figs.) 343-348.

L**Lightning:**

High level thunderstorms of July 31-August 1, 1959. (10 figs.) DeVer Colson. 279-285.

LILLY, DOUGLAS K.:

On the theory of disturbances in a conditionally unstable atmosphere. (11 figs.) 1-17.

LOKKE, DONALD H.:

Jet condensation trail shadows. (2 figs.) [Weather Note] 181.

M**Mean monthly values of precipitable water over the United States, 1946-56.** (1 fig.) Clayton H. Reitan. 25-35.**Measurement of sensible air-ground interface temperatures.** (3 figs.) Wayne Harrell and E. Arlo Richardson. 269-273.**MORELAND, W. B.:**

and H. Wexler and W. S. Weyant. A preliminary report on ozone observations at Little America, Antarctica. (14 figs.) 43-54.

N**NIEMEYER, LAWRENCE E.:**

Forecasting air pollution potential. (18 figs.) 88-96. Nighttime temperature rises in mountain canyons. (1 fig.) [Weather Note] G. F. Von Eschen. 70-71.

A non-tornadic spiral-shaped radar echo. (4 figs.) Limon E. Fortner and C. L. Jordan. 343-348.

O**Observations:**

Remarks on the optimum spacing of upper-air stations. (2 figs.) D. C. House. 97-100.

Reply (to correspondence, Use of tetroons for mesometeorological investigations, J. K. Angell. 277) 277.

Use of tetroons for mesometeorological investigations. [Correspondence] J. K. Angell. 277. (Reply D. C. House. 277.)

O'CONNOR, JAMES F.:

The weather and circulation of April 1960—A sharp mid-month drop in the zonal westerlies accompanied by a temperature reversal in the contiguous United States. (7 figs.) 158-166.

OGDEN, D. E.:

and D. B. Swinton. ARCAS temperature data in the mesosphere. (2 figs.) 191-192.

On a special distribution of maximum values. (2 figs.) Raymond Sneyers. 66-69.

On changes in zonal momentum in short-range numerical prediction. (6 figs.) A. Wiin-Nielsen. 55-65.

On the practical use of graphical prediction methods. (1 fig.) Richard J. Reed. 209-218.

On the theory of disturbances in a conditionally unstable atmosphere. (11 figs.) Douglas K. Lilly. 1-17.

Ozone:

A preliminary report on ozone observations at Little America, Antarctica. (14 figs.) H. Wexler, W. B. Moreland, and W. S. Weyant. 43-54.

P**PACK, D. H.:**

and J. K. Angell. Analysis of some preliminary low-level constant level balloon (tetroon) flights. (13 figs.) 235-248.

POPHAM, R. W.:

and D. Q. Wark. TIROS I observations of ice in the Gulf of St. Lawrence. (5 figs.) 182-186.

Precipitable water:

Mean monthly values of precipitable water over the United States, 1946-56. (1 fig.) Clayton H. Reitan. 25-35.

Precipitation:

On a special distribution of maximum values. (2 figs.) Raymond Sneyers. 66-69.

A preliminary report on ozone observations at Little America, Antarctica. (14 figs.) H. Wexler, W. B. Moreland, and W. S. Weyant. 43-54.

Pressure rise at Yakutat, December 18, 1959. (1 fig.) [Weather Note] Mac A. Emerson. 18.

Pressure:

Pressure rise at Yakutat, December 18, 1959. (1 fig.) [Weather Note] Mac A. Emerson. 18.

Rapid pressure variations in Iceland. (1 fig.) [Weather Note] Eysteinn Tryggvason. 256.

Publications by Weather Bureau authors. 24, 121, 130, 262, 293.

Publications:

New Weather Bureau publications. 150, 234, 362.

R

Radar meteorology:

An apparent observation of ice crystal haze by radar. (8 figs.) [Weather Note] Patrick E. Hughes. 349-352.

A non-tornadic spiral-shaped radar echo. (4 figs.) Limon E. Fortner and C. L. Jordan. 343-348.

Radiation:

An extension of a table of absorption for Elsasser Bands. D. Q. Wark and M. Wolk. 249-250.

Rapid pressure variations in Iceland. (1 fig.) [Weather Note] Eysteinn Tryggvason. 256.

Recent articles in other Weather Bureau periodicals. 255, 362.

REED, RICHARD J.:

On the practical use of graphical prediction methods. (1 fig.) 209-218

REITAN, CLAYTON H.:

Mean monthly values of precipitable water over the United States, 1946-56. (1 fig.) 25-35.

Relative humidity:

A statistical method for estimating the mean relative humidity from the mean air temperature. (2 figs.) William D. Sellers. 155-157.
